

Frontend Engineer with 4 years of experience building React and TypeScript applications across fintech, logistics, real estate, healthtech, and event operations. Strong background in responsive UI development, API integrations, workflow-heavy platforms, dashboards, and performance-focused frontend delivery.

EDUCATION

Ashesi University - Berekuso, Eastern Region, Ghana
Bachelor of Science, Management Information Systems

Sept 2018 - June 2022

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript

Technologies: React, Tailwind CSS, TanStack Query, Zustand, Vitest, Playwright, OpenApi-ts, Astro, Bitbucket, GitHub, Mantine, MUI

WORK EXPERIENCE

Accede Ghana Limited – Accra, Ghana
Frontend Engineer

Aug 2022 - Present

- Designed, built, and maintained production-grade web applications across fintech, logistics, real estate, and event domains using **React**, **TypeScript**, and **Tailwind**, delivering responsive and performant user experiences.
- Collaborated closely with product managers, designers, and backend engineers to integrate Swagger-documented APIs, clarify ambiguous requirements, and drive product decisions grounded in user needs.
- Proactively identified UX gaps, edge cases, and QA risks early in the development cycle, helping reduce rework and improve release readiness.
- Served as the primary QA liaison, managing bug reports, coordinating resolutions across frontend/backend, and ensuring timely retesting and deployment.

KudiGo Limited - Accra, Ghana
Product Manager Intern

May - Aug 2021

- Supervised a testing team of 18 employees and customers on 8 new web and mobile application features.
- Managed a team of 3 engineers to develop a user-friendly WhatsApp Chat bot as a digital shopping assistant with a focus on user experience resulting in 4.5-star rating from 96.7% users in user experience testing.

PROJECTS

MC Marine Services Website (Freelance)

Nov 2025

Technologies Used: React, Typescript, Vite, Intersection Observer API, WebP, Generouted.
Marketing website for a Ghana-based marine and cargo surveying company.

- Served as the **sole engineer**, architecting and delivering a responsive **React + TypeScript** marketing website, deployed on Hostinger with a **custom domain and managed hosting**.
- Implemented image and performance optimizations including lazy loading, WebP conversion, Intersection Observer, code splitting, and async decoding to improve load speed and Core Web Vitals.

GrantSpace

Oct - Sept 2025

Technologies Used: React, Typescript, Axios, Tailwind Css, Tiptap, ChatGPT.
AI-powered grant discovery and proposal support platform.

- Implemented an **AI-driven live chat feature**, enabling users to describe business needs and receive tailored grant recommendations in real time.
- Enhanced the grant proposal drafting experience by integrating the **Tiptap editor** with custom AI-powered features including automated drafting, tone refinement, and a robust **version history system** for comparing and restoring edits.

Piver - Global Freight Logistics Platform

Jan - Sept 2025

Technologies Used: React, Typescript, Vite, React Query, Vitest, GSAP, Azure Devops, OpenAPI TS, Generouted
Digital logistics platform connecting consignors, brokers, and logistics partners.

- Built a responsive marketing website in a 3-person frontend team, using GSAP for polished scroll interactions and pixel-precise UI delivery including **dashboard views**, **wizard-style forms**, and **CRUD workflows for shipping and user management**.
- Leveraged **Vitest** for unit testing and integrated OpenAPI tools (**openapi-ts**, **openapi-fetch**, **openapi-react-query**) to support type-safe API contracts, endpoint integration, and reliable data-fetching workflows.

NCD Church Event Management App - (Freelance) Sole Frontend Engineer

Jun - Dec 2024

Technologies Used: React, Vite, SWR, Zustand, Formik, React-QR-Scanner, Axios, Material UI, Tailwind, Orval.

Mobile-first web app to streamline church event planning and management for participants, organizers, and volunteers.

- Developed a dynamic family multistep registration flow with country-specific phone formatting, **bulk CRUD operations** for family member details, and dynamic form fields based on participant type.
- Implemented **authentication processes**, including user login, logout, blocking users, and forgot/reset password functionalities.
- Implemented **in-app notifications** and **QR scanning** for scanning participant tags, enabling event-related operations such as session check-ins and meal access.
- Created comprehensive **reporting and analytics**, including event data metrics, participant demographics, transportation, room allocation, and meal data, presented using metric cards and tables for easy analysis.

Trybz - Real Estate Management

Feb 2023 - Sept 2024

Technologies Used: React, Zustand, JavaScript, Axios, Tailwind, WYSIWYG Editor.

A comprehensive platform for managing estates, designed for both residents and management teams to streamline operations like visitor management, billing, and access control.

- Developed a custom **WYSIWYG email editor** enabling estate teams to draft, save, and manage internal communications, streamlining outreach and engagement.
- Built interactive **data visualizations** (pie charts, bar graphs, time-series plots) to present estate-wide activity and resident usage trends, aiding real-time decision-making.
- Implemented a **user impersonation** feature for administrators, improving issue resolution efficiency and reducing response times.

Not Forgotten Memorial Tribute Book

Sept - Oct 2023

Technologies Used: React, TypeScript, Turn.js, Fabric.js, Tailwind CSS, Trello

Digital tribute-book platform for preserving memories through curated stories and images.

- Built interactive **sharing and download flows** for user-generated tribute books, enabling families to preserve and distribute memories.
- Responsible for building the digital book including complex **responsive layouts** for life-phase-based **image collages** and **narrative timelines**, using **Fabric.js** and **Turn.js** to mimic real-book aesthetics and interactivity.

Kacha

Aug 2022- Mar2023

Technologies Used: React, Next.js, TypeScript, Redux, Axios, Tailwind CSS, Firebase, React Query

Mobile-first fintech platform for the Ethiopian market supporting money transfers, bill payments, airtime purchases, remittances, digital lending, and withdrawals.

- Built key financial workflows including **secure login, money transfers, bill payments, airtime purchases, remittances, digital lending, and withdrawals** across the customer portal and admin dashboard
- Delivered **22+ UI screens** and integrated **15+ API endpoints within one month**, helping accelerate product launch readiness in a fast-paced delivery environment

CO – CURRICULAR ACTIVITIES

StartersTech -Tema, Ghana

Jan - Jun 2022

Facilitator Supervisor & STEM Course Moderator

- Oversaw 4 facilitators teaching robotics, programming, and engineering concepts to children, driving improved teaching quality and engagement.
- Led weekly review meetings to evaluate and improve STEM teaching materials, ensuring alignment with learning goals and student engagement.

Campaign for Female Education - Tema, Ghana

Aug – Oct 2018

Mentor

- Mentored 120 junior high school students on finding their career path as well as preparing them for high school life with student feedback reporting 83% increase in motivation and impact.

ADDITIONAL

Certifications: [Meta Frontend Developer](#), [Microsoft Azure Developer Associate](#)
